

Introducing SciVerse SCOPUS

مجموعه اسلایدهای کتابخانه مرکزی دانشگاه علوم پزشکی مشهد

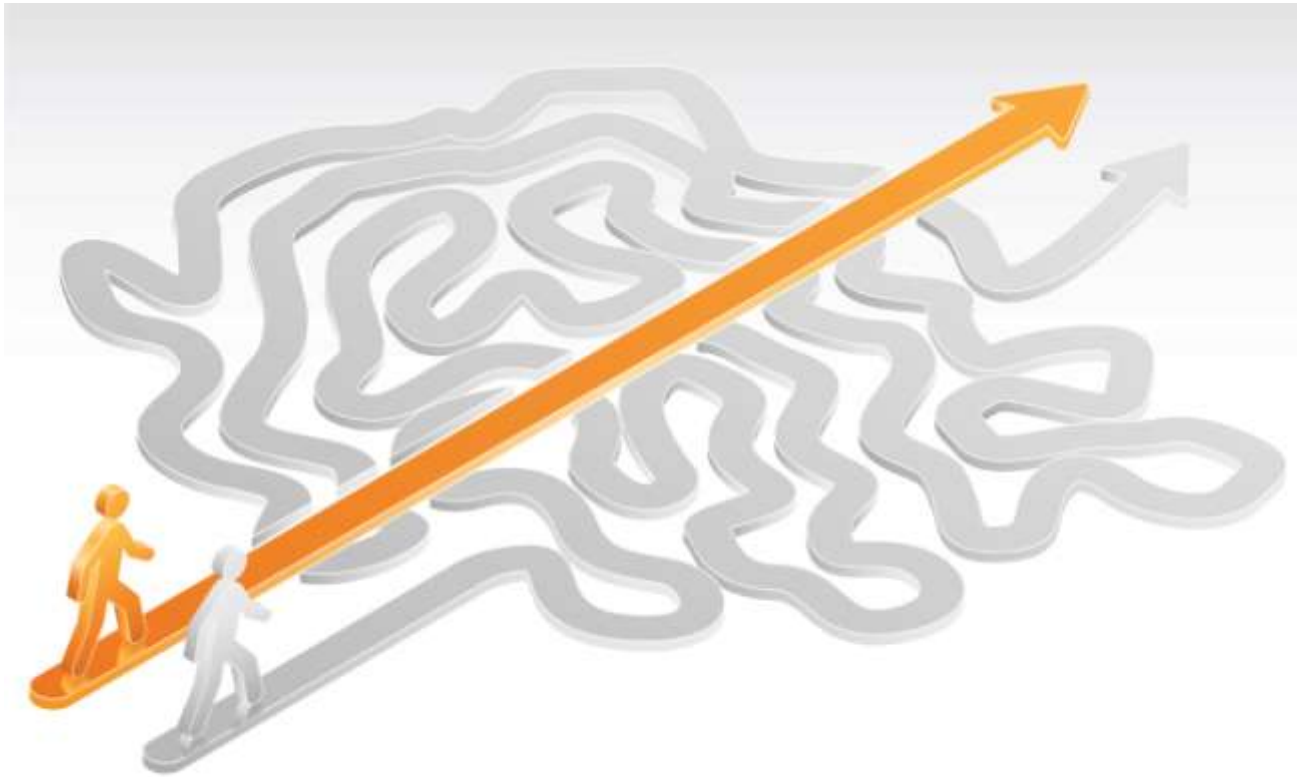

What internet sources we usually search?

"Give me your data, my way"

The problem isn't having too much information...

**...It's about accessing the right information
in an efficient and effective way**

Table of Contents

1. Why is Elsevier Launching SciVerse?

2. What is SciVerse?

3. When will I see SciVerse?

Open to Accelerate Science

Table of Contents

1. Why is Elsevier Launching SciVerse?

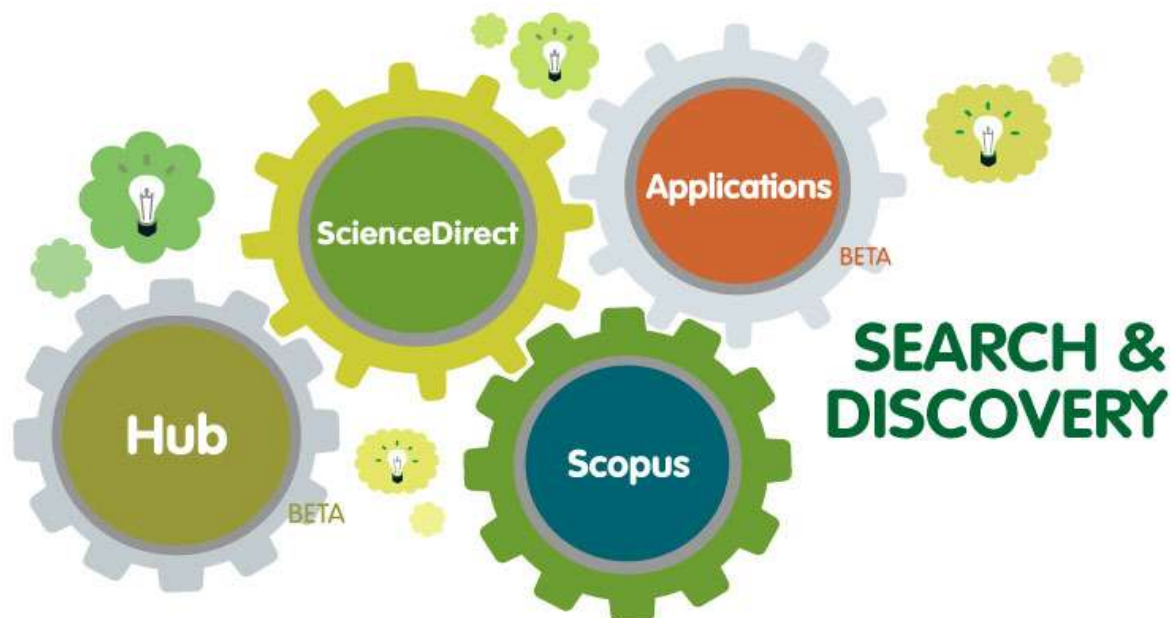

2. What is SciVerse?

3. When will I see SciVerse?

What is SciVerse?

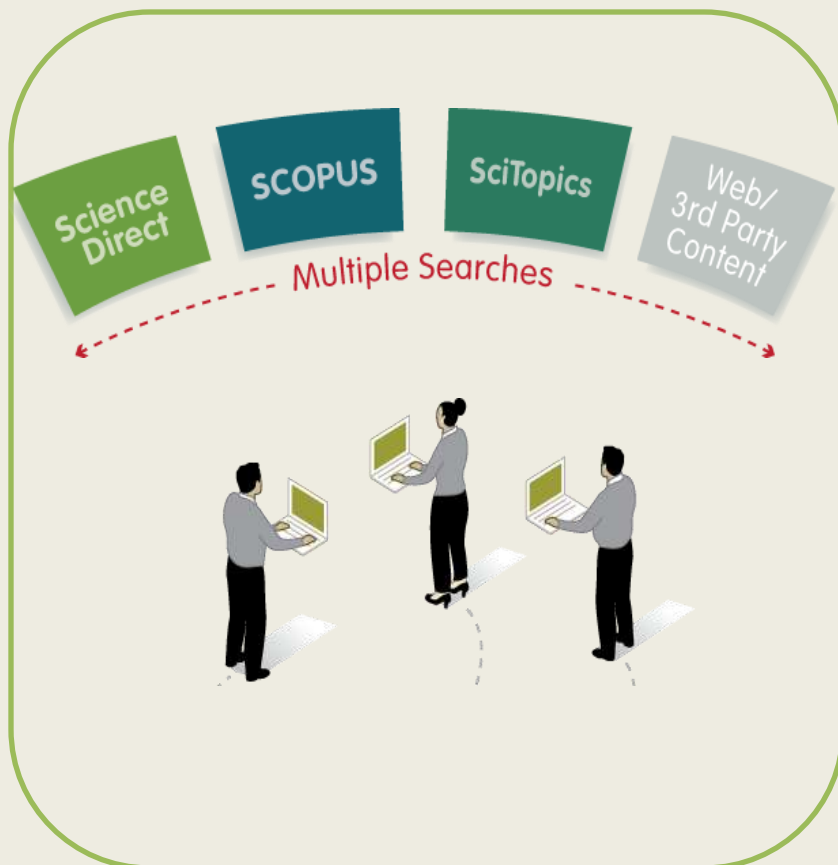

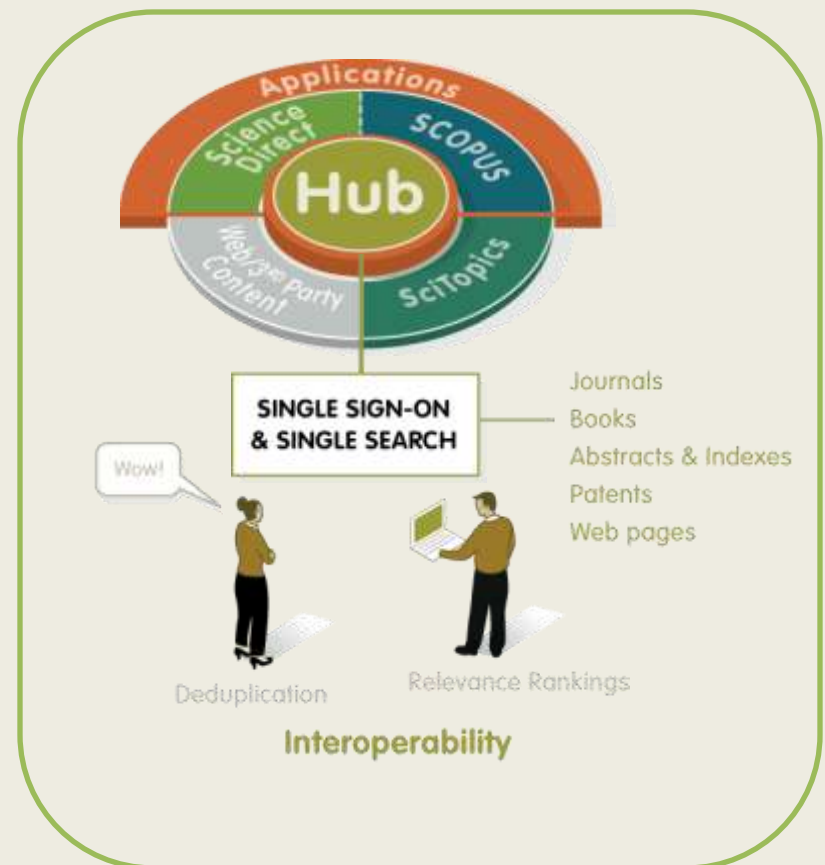

SciVerse : intelligent search and discovery across integrated content from ScienceDirect, Scopus, and the scientific web

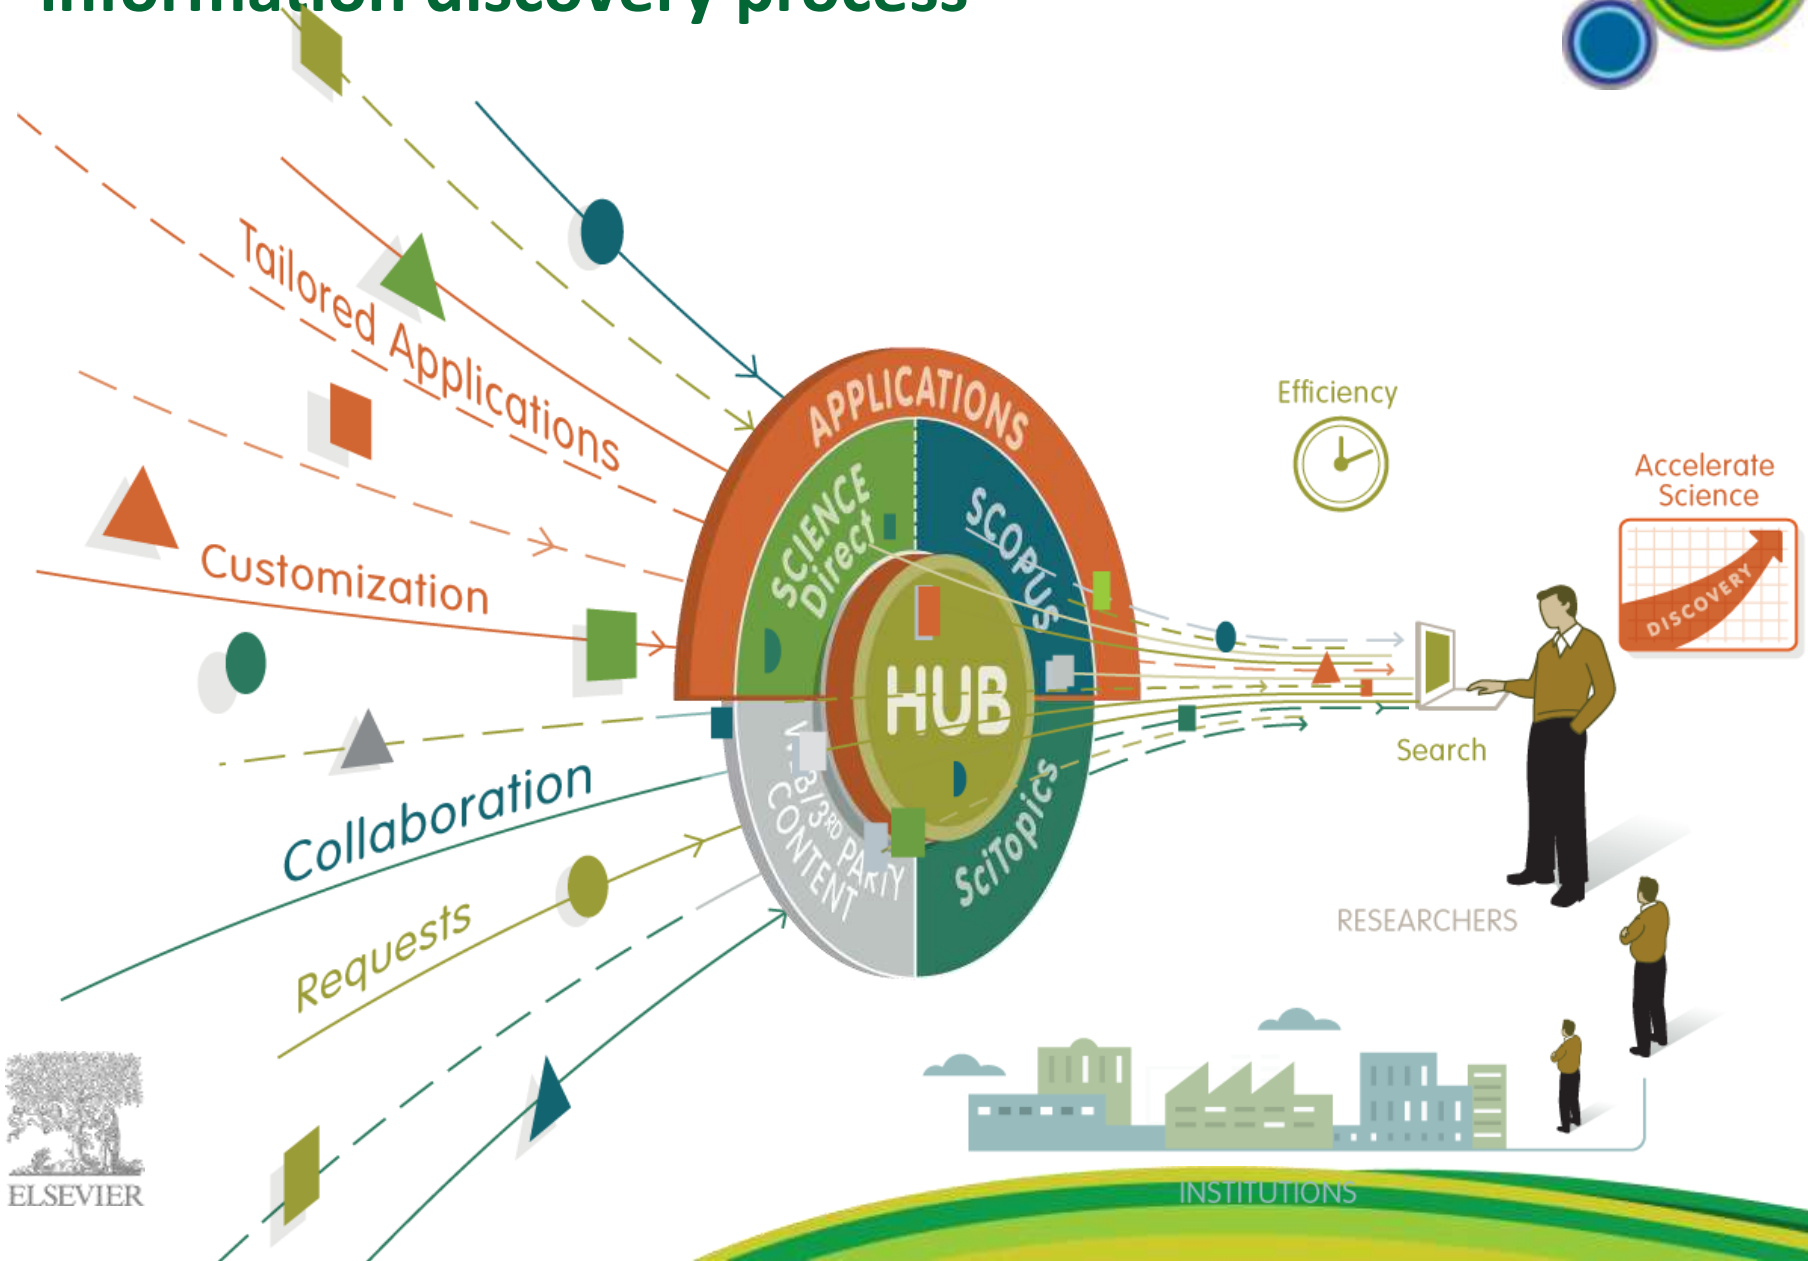

What is SciVerse?

Integrated Content & Discovery Tools + Productivity-Enhancing Applications

Researchers can save time and improve their information discovery process

Libraries can become focal point for applications

SciVerse Launched in Multiple Phases, 2010-11

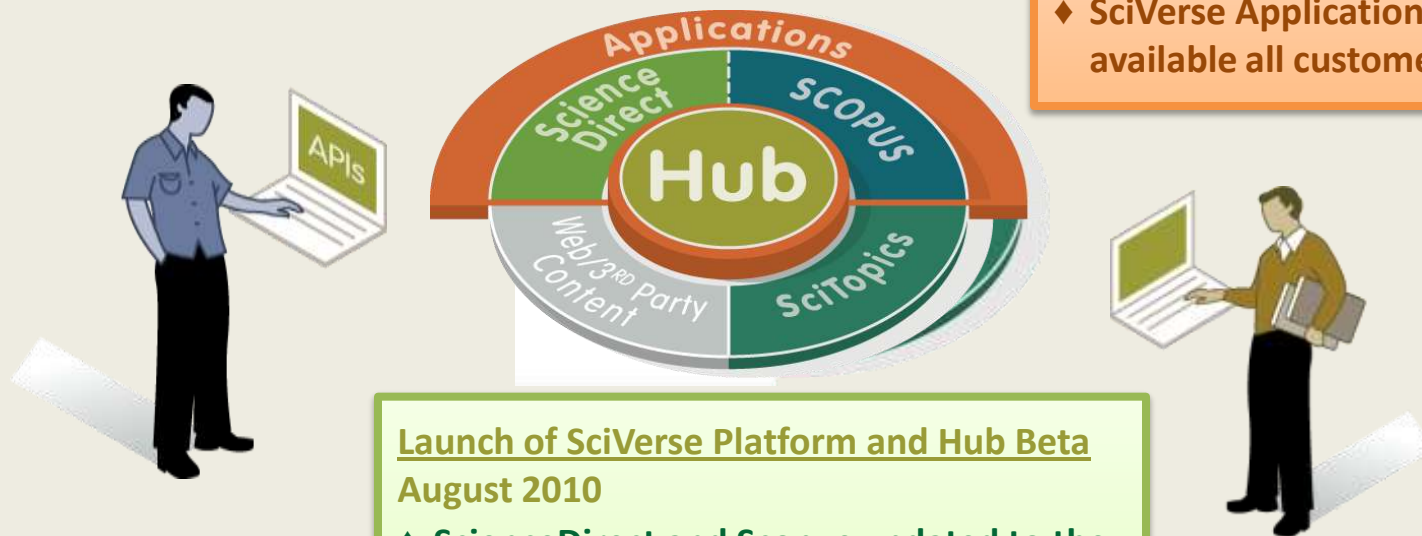

Launch of SciVerse Applications Beta

November 2010

- ◆ SciVerse Applications Beta available to select customers

January 2011

- ◆ SciVerse Applications Beta available all customers

Launch of SciVerse Platform and Hub Beta

August 2010

- ◆ ScienceDirect and Scopus updated to the SciVerse platform with increased interoperability
- ◆ SciVerse Hub Beta and three embedded Applications launched and available to customers at no additional cost

In August 2010, SciVerse Hub launched with three free Applications for all customers

SciVerse Platform

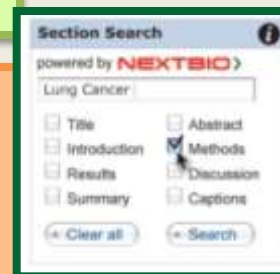

- **Single log-in** provides access to all licensed and free SciVerse products
- **Increased interoperability** and easier navigation between solutions

SciVerse Hub Beta

- **One search** across ScienceDirect, Scopus, and web content
- **Three embedded applications** for all users that include:

Preview of SciVerse Applications

- **Methods Section Search** for full text articles
- **Matching Sentences** displays query words in their full sentences
- **Prolific Author Search** finds the most “prolific authors” publishing articles about search

In August 2010, ScienceDirect and Scopus integrated on the SciVerse platform with increased interoperability

SciVerse Platform

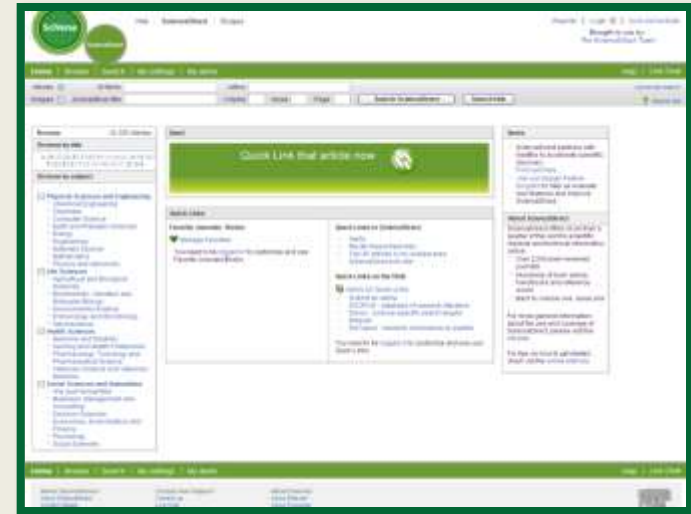

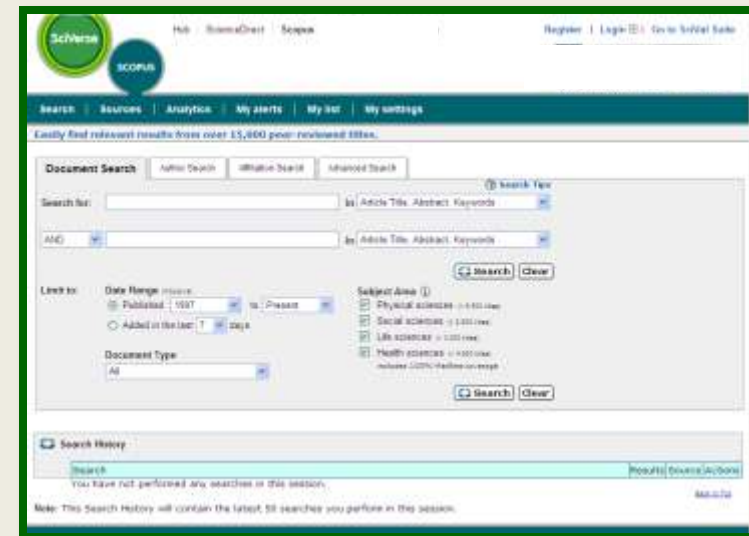

- **Single log-in** provides access to all licensed and free SciVerse products
- **Increased interoperability** and easier navigation between solutions

SciVerse ScienceDirect

- **Image Search** for full-text articles and books
- Integration of **REFLECT** application
- **Reference Work Helper** links to relevant reference works

SciVerse Scopus

- **Author Evaluation** tool visualizes author data
- **Scopus Enhanced Affiliation Profile** allows hierarchy of institutional relationships

SciVerse SCOPUS contains:

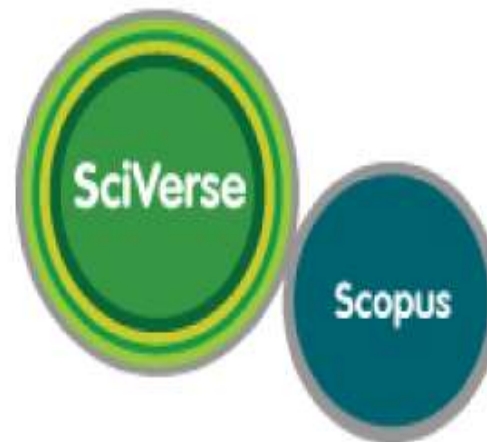

- **SciVerse Scopus is the world's largest abstract and citation database of peer-reviewed literature and quality web sources.**
 - **>40 million records,**
 - **70% with abstracts Nearly 18,000 titles from 5,000 publishers worldwide**
 - **70% of content is pulled from international sources Includes over 3 million conference papers**
 - **Provides 100% Medline coverage Offers sophisticated tools to track, analyze and visualize research**
-

ثبت نام در Scopus

The screenshot displays the SciVerse Scopus website. At the top, the 'SciVerse Scopus' logo is on the left, and navigation icons (back, forward, search) are on the right. Below the logo, a dark banner reads 'Registering and Logging In'. The main navigation bar includes 'Hub | Sciencedirect | Scopus', 'Register | Login', and 'Go to SciVal Suite'. A sidebar on the left contains 'Search | Sources | Analysis' and a 'Did You know these Scopus' section. The central area features a 'Document search' form with a 'Search for:' field (example: 'heart attack'), a 'Limit to:' section with 'Date Range' (radio buttons for 'Published' and 'Added to'), and a 'Subject Area' section with checkboxes for 'Life Sciences (> 3,400 titles)', 'Physical Sciences (> 5,500 titles)', 'Health Sciences (> 5,300 titles, 100% Medline coverage)', and 'Social Sciences & Humanities (> 2,800 titles)'. A 'Search' button is at the bottom right of the form. A 'Search history' section is at the bottom left. A right sidebar lists 'What's new in SCOPUS' (Latest features, SJR & SNIP metrics), 'About Scopus' (What is Scopus?, Content coverage, What do users think?, Scopus tutorials), and 'Resource Library' (Brochures, User guides, Fact sheets). A 'Live Chat | Help | Labs' link is at the top right of the right sidebar.

What's new in SCOPUS:

- Latest features
- SJR & SNIP metrics

About Scopus:

- What is Scopus?
- Content coverage
- What do users think?
- Scopus tutorials

Resource Library:

- Brochures
- User guides
- Fact sheets

When you register in Scopus, you can:

- Create Search Alerts, Document Citation Alerts, and Author Citation Alerts
- Save searches
- Saves lists of documents and grouped authors
- Customize your personal Scopus sessions

۴ راه جستجو در SciVerse Scopus

The image shows the top section of the SciVerse Scopus website. At the top left, there are two circular logos: a green one with 'SciVerse' and a dark blue one with 'Scopus'. To the right of these logos is a navigation bar with links: 'Hub | ScienceDirect | Scopus'. Below this is a dark blue horizontal bar with white text links: 'Search | Sources | Analytics | My alerts | My list | My settings'. Underneath this bar is a light gray banner with the text 'Learn about the [new platform](#) for ScienceDirect and Scopus users'. The main search area has a light gray background. At the top of this area are four buttons: 'Document search' (highlighted with a dark border), 'Author search', 'Affiliation search', and 'Advanced search'. Below these buttons is a search form. It starts with the text 'Search for:' followed by a large white input box. To the right of the input box is the text 'in'. Below the input box is a hint: 'E.g., "heart attack" AND stress'.

اختراع (Invention) محصول یا فرآیندی است که راه جدید انجام کاری را ارائه می دهد یا راه حل فنی جدیدی را برای مشکل خاصی پیشنهاد می کند.

حق ثبت اختراع یا پتنت (patent) حق انحصاری است که در قبال اختراع ثبت شده به مخترع یا نماینده قانونی او اعطا یا (grant) می شود.

Patent?

- حمایت patent به این معنا است که مورد اختراع را نمی‌توان بدون اجازه دارنده patent به صورت تجاری تولید، استفاده یا توزیع نمود و به فروش رساند.
- به این نکته مهم باید توجه داشت که patent مجوز تولید محصول اختراعی نیست بلکه تنها دیگران را از تولید آن باز می‌دارد.

If you already use one of these readers, subscribe with one click

Creating Scopus HTML feed

Now you can create Scopus HTML feed for your own website and generate the code you need to copy into your website:

Create HTML Feed

اگر از سرویس پست الکترونیک گوگل Gmail استفاده می کنید، آن نشانی URL را می توانید به google reader اضافه نمایید.

The screenshot shows the Google 'Add to Google' interface. At the top is the Google logo and a search bar. Below the search bar is a blue button labeled 'Add to Google'. The main content area displays the title '"lung cancer" adenocarcinoma smoking' and a description of Scopus as a research database. A URL is provided: <http://syndic8.scopus.com/getMessage?registrationId=JBBDKERDKDJLRCNIBKEJCLMJCOD...>. Below this, it states 'Google offers two different ways to keep up-to-date with your favorite sites:'. Two options are presented side-by-side: 'Add to Google homepage' and 'Add to Google Reader', separated by the word 'or'. Each option has a 'Sample' preview below it. The 'Add to Google homepage' sample shows a typical Google homepage layout with search results for 'Reuters' and 'Stock Market'. The 'Add to Google Reader' sample shows the Google Reader interface with a list of feeds, including 'Official Google Blog'.

Google Add to Google

"lung cancer" adenocarcinoma smoking

Scopus is the largest abstract and citation database of research literature and quality web sources. Quick, easy and comprehensive, Scopus provides superior support of the literature research process. Scopus is updated everyday. <http://syndic8.scopus.com/getMessage?registrationId=JBBDKERDKDJLRCNIBKEJCLMJCOD...>

Google offers two different ways to keep up-to-date with your favorite sites:

Your Google homepage brings together Google functionality and content from across the web, on a single page.

Google Reader makes it easy to keep up with the latest content from a large number of sites, all on a single reading list.

Add to Google homepage or **Add to Google Reader**

Sample

The sample for 'Add to Google homepage' shows a Google search results page with links to Reuters, Gmail, and the Stock Market. The sample for 'Add to Google Reader' shows the Google Reader interface with a list of feeds, including the Official Google Blog.

Of the 326 documents considered for the *h* index, 41 have been cited at least 41 times.

Scopus does not have complete citation information for articles published before 1996.

[About h-Graph](#)

H-Index

- H-Index شاخص جدیدی از شاخص‌های علم‌سنجی است.
- این شاخص در سال ۲۰۰۵ میلادی توسط Jorge Hirsch در دانشگاه کالیفرنیا ابداع شد.
- این شاخص در واقع با هدف ارزیابی کیفی اثر و ارزیابی کمی برون‌داد پژوهشی محققین ابداع شده است.
- مفهوم H-Index عبارت است از تعداد مقالات نویسنده که تعداد ارجاعات برابر با h و یا بیشتر از آن دارند.
- مثلاً چنانچه H-Index محققی ۵ باشد، مفهوم آن این است که این محقق حداقل ۵ مقاله منتشر شده دارد که هرکدام حداقل ۵ استناد یا Citation دارند. به عبارت دیگر مفهوم آن این است که سایر مقالات این محقق کمتر از ۵ استناد دارند.
- امروزه این شاخص معادل Impact Factor برای محققین محسوب می‌شود.

Overview

Authority matters. The Prolific Authors application combs the peer reviewed content in Scopus to find the most prolific authors within your search results, allowing you to identify authorities in your field and quickly get an overview of their peer reviewed work in Scopus. Hovering over an author name displays how many of their documents matched your search, clicking on an author name takes you to the complete list of publications by that author in Scopus. Scopus users have full access to Scopus content and functionality; others see the latest 20 documents from the author, with links to the publisher full text. Powered by NextBio, content from Scopus.

Overview

Methodology matters. The Methods Search application allows targeted search focused on the methods and experimental procedures section of Elsevier full text articles - helping you find the methods you need for your research. By searching only in the Methods and Materials and Experimental Procedures sections of full text articles on ScienceDirect and calculating relevance based on matches within them, Methods Search targets your query to the text which matters most, providing more meaningful results for methods-related queries than a search across the entire document. Results provide immediate previews into the full text with snippets from the methods section of each results, showing your search terms in context. Additional filtering options help you limit your query to specific journals, authors and more. Powered by NextBio.

Overview

Context matters. With the Matching Sentences application, you will see your search terms embedded in their original, complete sentences in the results - to give context, and allow you to quickly determine which articles are relevant to your research. Run a search in SciVerse Hub, and Matching Sentences will find all the documents with at least one sentence which contains ALL your search terms across all of the full text documents in ScienceDirect, showing you how many sentences and paragraphs contained your search terms. Rather than simply returning long lists of documents for you to sort through, clicking on the counts takes you immediately to the Matching Sentences browser, where you can scan through the matching sentences across all documents as well as add or remove search terms from your query to filter further. Use Matching Sentences to more quickly evaluate documents for further reading, or use it to quickly scan many documents for the facts and information most relevant to your research.
